Enterprise Security Certificate & Clearance

Background elements act as persistent canvas underlays behind body flow.

1. Clearance Details

The bodyBackground configuration in pageSettings renders its visual shapes to the underContent layer on each page prior to normal flow elements. This creates seamless certificate frames, accent borders, or watermarked canvas geometry without displacing layout flow coordinates.

Security Attribute	Assigned Parameter	Verification
Protocol Version	TLS 1.3 / FIPS-140-3	VERIFIED
Issuer Organization	Global Cyber Trust Authority	VERIFIED
Signature Algorithm	ECDSA SHA-384	ACTIVE
